**Exploring Earth, Sun, and - GVLIBRARIES.ORG**  
Originally published in Journal of Creation 7, no 1 (April 1993): 2-42.. Abstract. Using a figure published in 1960 of 14,300,000 tons per year as the meteoritic dust influx rate to the earth, creationists have argued that the thin dust layer on the moon's surface indicates that the moon, and therefore the earth and solar system, are young.

**Moon Dust and the Age of the Solar System | Answers in Genesis**  
The earth orbits the moon, and the moon orbits the sun. The earth and moon both orbit the sun, not each other directly, they just stay nearby one another. The sun and moon orbit the earth.
