Annotation This report examines the possibility that global demand for capital will tend to outstrip supply, thus putting upward pressure on global real interest rates. The paper discusses the demand for foreign capital in developing countries, the effect of this demand on savings in industrial countries, and net capital flows from industrial to developing countries. The analysis of trends over the next 10 to 15 years suggests that a large rise in international real interest rates is unlikely as long as fiscal consolidation in industrial countries remains on track.

A "nuanced and insightful" (New Statesman) portrait of Britain's most famous female poet, a woman who invented herself and defied her times. "How do I love thee? Let me count the ways." With these words, Elizabeth Barrett Browning has come down to us as a romantic heroine, a recluse controlled by a domineering father and often overshadowed by her husband, Robert Browning. But behind the melodrama lies a thoroughly modern figure whose extraordinary life is an electrifying study in self-invention. Born in 1806, Barrett Browning lived in an age when women could not attend a university, own property after marriage, or vote. And yet she seized control of her private income, defied chronic illness and disability, became an advocate of the revolutionary Italy to which she eloped, and changed the course of cultural history. Her late-in-life verse novel masterpiece, Aurora Leigh, reveals both the brilliance and originality of her mind, as well as the challenges of being a woman writer in the Victorian era. A feminist icon, high-profile activist for the abolition of slavery, and international literary superstar, Barrett Browning inspired writers as diverse as Emily Dickinson, George Eliot, Rudyard Kipling, Oscar Wilde, and Virginia Woolf. Two-Way Mirror is the first biography of Barrett Browning in more than three decades. With unique access to the poet's abundant correspondence, "astute, thoughtful, and wide-ranging guide" (Times [UK]) Fiona Sampson holds up a mirror to the woman, her art, and the art of biography itself.

World Bank Discussion Paper No. 292. Examines the anatomy of the Republic of Korea's financial reform policy since 1979 in order to place the nation's financial reform plan of 1993 in a proper context. Financial deregulation in the Republic of Korea, initiated in 1979, coincided with similar programs in South America and East Asia. The reforms were successful in spite of a mild form of financial repression and a deregulation policy that ran an erratic course. The republic moved decisively in 1993 toward a conventional type of financial liberalization by announcing a blueprint of reforms to be implemented over a five-year period ending in 1997. This paper examines the anatomy of the Korean financial reform policy since 1979 in order to place its financial reform plan of 1993 in the proper context. The report presents a conceptual framework of the Korean financial system and policies, examines interest rate reforms on various levels, and discusses changes in the credit allocation system that were undertaken in earlier phases of the reforms. The book goes on to review the rationale of the final financial reform phase, the sequencing of its various elements, and the assessment. Broad conclusions are presented.
