CPH Exam Quick Reference Review, Second Edition is a comprehensive study guide that will thoroughly prepare you for the new Certification in Public Health Exam. In seven chapters, you'll get a thorough review of each of the core competencies as recommended by the Association of Schools of Public Health (ASPH) as well as tips, test-taking skills, recommended resources, and 200 practice test multiple choice questions accessible online.

Cracking the MRCS Viva is an outstanding guide to the MRCS Viva examination. Its unique approach recreates the structure and content of each individual viva, allowing the reader to self-test, or two students to recreate mock viva sessions for themselves. Divided into six sections to mirror the exam - applied surgical anatomy, operative surgery, applied surgical pathology, principles of surgery, applied surgical physiology, and critical care - each section covers a range of topics, listed alphabetically, and contains all the information required to pass the exam using concise, bullet-point text, helpful tables and easy to reproduce diagrams. Written by registrars who have all recently passed the MRCS, plus an MRCS examiner, this comprehensive and user-friendly revision guide also contains considerable input from other senior specialists.

The latest edition of this text is the go-to book on rapid response systems (RRS). Thoroughly updated to incorporate current principles and practice of RRS, the text covers topics such as the logistics of creating an RRS, patient safety, quality of care, evaluating program results, and engaging in systems research. Edited and written by internationally recognized experts and innovators in the field, Textbook of Rapid Response Systems: Concepts and Implementation, Second Edition is a valuable resource for medical practitioners and hospital administrators who want to implement and improve a rapid response system.

Textbook for MRCOG –1: Basic Sciences in Obstetrics & Gynaecology is a comprehensive resource for candidates preparing for the MRCOG Part 1 exam, and all medical students wishing to pursue specialisation in obstetrics and gynaecology in the UK. Includes over 1000 SBA questions and answers for self-assessment. The book is further enhanced by over 230 illustrations and images, making this an ideal revision guide.

Since reproducibility is a way of testing ones understanding, this material will help the reader, who might have read the appropriate textbook for each section as recommended by their institution, to have a pre-assessment of his/her understanding of the textbook of pharmacology he/she is using or rather the concept thought them by their instructors/mentors/lecturers as the case may be, before he/she is assessed in the exams. I have included 3000 exam focused MCQs which are evenly distributed to cover the subject from A-Z, including one answer questions, multiple answer questions and causally related questions as well as rational approach to answering such questions in order to serve as a guide for the reader. It is hoped that this material will be of greatest benefit to the reader especially if he/she might have read the appropriate section on the standard textbook before approaching the questions herein.

So, yet another self-help/self-improvement book. Why should you even consider it? OK, here are three reasons: –First, it zeros in on some of the most common problems people have in dealing with each other. These are repetitive. The people may be different, but the problems stay the same. The 12 skills covered include: learning to be a careful listener; developing empathy for others; controlling our egos; becoming an assertive person; learning to be accountable in relating to people; respecting others; improving communication skills; stopping the “ mind reading ” of others; breaking away from the need to always be right in dealing with people; how to stop gossiping; not meddling in others ’ lives; and becoming a more optimistic person. –Second, the topics of ego control, respect, mind reading, gossiping, meddling, and always needing to be right are rarely, if ever, found in self development books. –Finally, the book is easy to read, very practical, relatively short, and really helpful. You ’ ll find it to be a motivating and self-empowering read.

The perfect way to prepare for exams and get the grade you want! Easy access to key learning objectives for each chapter, outlines of key sections, and self-test questions, help you build problem-solving skills while preparing for exams. The Addiction Casebook presents 12 patients with DSM-5 addiction diagnoses -- plus one experiencing problematic Internet use -- and illustrates practical and successful strategies for diagnosing and treating these patients. The book's cases are analogous to those that

clinicians commonly encounter in their everyday practice and effectively demonstrate the intersection of addiction with other psychiatric diagnoses. The experience and clinical wisdom of three generations of addiction specialists are distilled into a single volume that includes the most salient ideas and treatment suggestions for clinicians. This informative, practical volume strikes a colloquial, and sometimes humorous, tone. General psychiatrists and psychiatric residents seeking to gain expertise in and an understanding of addiction will find it a delight to read, as will a diverse audience of family practitioners, internists, pediatricians, medical students, allied professionals, and anyone interested in sharpening her or his clinical skills. The book is the first to cover the diagnosis, assessment, and treatment of substance use disorders and other addictions within the DSM-5® framework. Its many valuable and helpful features include An outline of the progression in thinking about psychiatric diagnoses with the move from DSM-IV-TR® to DSM-5®. Descriptions of hands-on experience with the current diagnosis and treatment of substance use disorders and other addictions that complement substance abuse textbooks and bring the material to life. Coverage of such subject areas as alcohol, caffeine, cannabis, hallucinogen, inhalant, opioid, sedative, hypnotic, anxiolytic, stimulant, tobacco, gambling, and Internet addictions. Key points and multiple-answer questions at the end of each chapter that highlight the chapter's most pertinent takeaways and apply and strengthen readers' knowledge of chapter information. Extensive use of tables, figures, charts, and other instructive materials to illuminate and clarify addiction concepts. In their preface, the authors assert their hope that the book "will provide the fundamental tools for working with the substance-using patient in the hospital, the clinic, and the community." The Addiction Casebook exceeds its goal by providing mental health and other medical practitioners with timely, current strategies for addiction diagnosis and treatment in a succinct, engaging, and entertaining volume.
