Outpatient surgery, also known as ambulatory surgery, day surgery, day case surgery, or same-day surgery, is surgery that does not require an overnight hospital stay. The term "outpatient" arises from the fact that surgery patients may enter and leave the facility on the same day. The advantages of outpatient surgery over inpatient surgery include greater convenience and reduced costs.

Outpatient surgery - Wikipedia
Beverly Parks is a 62-year-old female on the medical-surgical unit. The patient is 3 days post op for abdominal surgery to repair an incarcerated hernia. The patient has not passed stool while in the hospital. The patient's healthcare provider has ordered a progressive diet, however the patient tells the nurse "I'm too uncomfortable to eat, I feel so nauseated."
