AS/NZS 3760:2010 - Electrical Safety Standard. AS/NZS 3760:2010 is an electrical safety standard in Australia that specifies the generally observed safety inspection and maintenance standards. This includes the safety inspection for test and tag of single and polyphase (240v - 415v) portable electrical equipment, and, machinery connected to supply by flexible cord which is currently in-service, returning to service, available for re-sale or hire.

AS/NZS 3760:2010 | Electrical Safety Standard

The AS/NZS 3760 is an Australian Standard that oversees the Test and Tag industry in regards to electrical safety of portable appliances. Its main goal is to ensure workplaces are safe by setting out recommendations in relation to testing 240V, 3 phase and low voltage electrical equipment.

What is AS/NZS 3760? Complete 101 Guide

Just as important, the AS/NZS 3760 standard (Table 4) should be seen as a minimum requirement. A lot of workplaces will have different test and tag frequencies because of their own risk management and OHS planning. Likewise, some of these industries might require you to use certain Test and Tag Colours.
