ABSTRACT Chapter 49 of the book "2003 ASHRAE HANDBOOK: Heating, Ventilating, and Air-Conditioning Applications" is presented. It discusses factors involved in a service water heating system including heat energy source, heat transfer equipment, distribution system, and terminal hot-water usage device.

The 2015 ASHRAE Handbook—HVAC Applications comprises more than 60 chapters covering a broad range of facilities and topics, written to help engineers design and use equipment and systems described in other Handbook volumes. Main sections cover comfort, industrial, energy-related, general applications, and building operations and management. ASHRAE Technical Committees in each subject area have reviewed all chapters and revised them as needed for current technology and design practice. An accompanying CD-ROM contains all the volume's chapters in both I-P and SI units.

The 2012 ASHRAE Handbook—HVAC Systems and Equipment discusses various systems and the equipment (components or assemblies) they comprise, and describes features and differences. This information helps system designers and operators in selecting and using equipment. An accompanying CD-ROM contains all the volume's chapters in both I-P and SI units.
