Chapter 12 Eye 10th edChapter 12 The Lymphatic System

The lymphatic system consists of the lymphatic vessels, lymph nodes, and certain other lymphoid organs in the body ( Figure 12.1 ). Extremely porous blind-ended lymphatic capillaries pick up excess tissue fluid leaked from the blood capillaries ( Figure 12.2 ). The fluid (lymph) flows into the larger lymphatics and finally into the blood vascular

# File Type PDF Chapter 12 The Lymphatic System And Body Defenses Key

Lymphatic System: Not all blood plasma that leaks out of the capillaries to nurture body tissues is returned to the blood on the venule side of the capillary bed. In order to maintain the blood volume, however, that lost fluid must be returned somehow. One primary function of the lymphatic system is to return that fluid to the blood.

Chapter 12: The Lymphatic System Flashcards - Cram.com  
The lymphatic system, for most people, is associated with the immune system to such a degree that the two systems are virtually indistinguishable. The lymphatic system is the system of vessels, cells, and organs that carries excess fluids to the bloodstream and filters pathogens from the blood. The swelling of lymph nodes during an infection and the transport of lymphocytes via the lymphatic vessels are but
