This book introduces readers to the topical area of CSI: critical space infrastructure, which is defined as an emerging domain of systems-of-systems encompassing hardware, workforce, environment, facilities, business and organizational entities. Further, it includes unmanned air systems, satellites, rockets, space probes, and orbital stations, and involves multi-directional interactions essential for maintenance of vital societal functions (i.e., health, safety, economic and social well-being), the loss or disruption of which would have significant impact on virtually any nation. The topics covered include the main elements of CSI, CSI taxonomy, effects of CSI on other infrastructure systems, establishing quantitative and qualitative parameters, global and national effects of CSI failure, cascading disruptive phenomena, chilling effects in various fields, CSI protection, deliberate threats to space systems (e.g., electromagnetic pulse attacks), space governance, and a path forward for CSI research. Modern society is highly dependent on the continuous operation of critical infrastructure systems for the supply of crucial goods and services including, among others, the power supply, drinking water supply, and transportation systems; yet space systems – which are critical enablers for several commercial, scientific and military applications – are rarely discussed. This book addresses this gap.

We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original essays from today's leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course. While the book primarily focuses on American television, important programs with international origins and transnational circulation are also covered. Addressing television series from the medium's earliest days to contemporary online transformations of television, How to Watch Television is designed to engender classroom discussion among television critics of all backgrounds. Investigative journalist Jacques Pauw exposes the darkest secret at the heart of Jacob Zuma's compromised government: a cancerous cabal that eliminates the president's enemies and purges the law-enforcement agencies of good men and women. As Zuma fights for his political life following the 2017 Gupta emails leak, this cabal – the president's keepers - ensures that after years of ruinous rule, he remains in power and out of prison. But is Zuma the puppet master, or their puppet? Journey with Pauw as he explores the shadow mafia state. From KwaZulu-Natal and the Western Cape to the corridors of power in Pretoria and Johannesburg - and even to clandestine meetings in Russia. It's a trail of lies and spies, cronies, cash and kingmakers as Pauw prises open the web of deceit that surrounds the fourth president of the democratic era. -- from back cover.
