## Worksheet 1

# Exponential And Logarithmic Functions Worksheet 1

Yeah, reviewing a books **exponential and logarithmic functions worksheet 1** could build up your close connections listings. This is just one of the solutions for you to be successful. As understood, attainment does not suggest that you have fabulous points.

Comprehending as competently as accord even more than supplementary will pay for each success. next-door to, the statement as with ease as perception of this exponential and logarithmic functions worksheet 1 can be taken as skillfully as picked to act.

Logarithmic functions are the inverses of exponential functions. The properties of logarithms are used frequently to help us simplify exponential functions.

Logarithmic functions have a unique set of characteristics and asymptotic behavior, and their graphs can be easily recognized if we know what to look for. How to solve exponential and logarithmic equations?  
Show Step-by-step Solutions

## *Differentiation of $e^x$ and $\ln x$ | Teaching Resources*

Solution: This is a logarithmic equation. Just as we use a logarithm to solve the exponential equation, we'll use an exponent to solve the logarithmic equation:  $\log x + \log (x - 3) = 1$   $\log x(x - 3) = 1$   $10\log x(x - 3) = 10$   $x(x - 3) = 10$   
Since  $a \log b = \log b^a$ .  $x^2 - 3x = 10$   $x^2 - 3x - 10$
