Covenant marriages requiring premarital counseling and tighter strictures on divorce have recently emerged in some American states. At the same time, the doctrine of covenant has reemerged in religious

circles as a common way to map the spiritual dimensions of marriage. *Covenant Marriage in Comparative Perspective* brings together eminent scholars from Jewish, Orthodox, Catholic, Protestant, and Islamic religious traditions as well as experts on American covenant marriage. The introduction carries out an unprecedented comparison of contract and covenant in Jewish, Christian, and Muslim understandings of marriage. The rest of the book elucidates various facets of marriage from the perspectives of both jurisprudence and religion, producing an enlightening integrated picture of the legal and spiritual dimensions of marriage.

Knowing the Unknown Through Science and Sufism touches on the creation of the universe, starting from the Big Bang and following through the phases of evolution until the present day, discussing the appearance of life on earth after billions of years of turmoil. It looks at the early beginnings of religion in prehistoric societies and how this progressed into organized religion as we know it today. This book explores the similarities between the scientific concepts related to evolutionary change and the concepts that Sufis have highlighted with reference to verses of the Quran. It discusses the history of mankind and the journey through theological, philosophical, and spiritual phases. The book attempts to expand on the concept of time in relation to evolution and the difficulty in defining time and why the Quran mentions different times in different verses and also on an understanding of time in the present day. The subject matter is vast, but this book has attempted to address it in a more easily accessible way.

AN INDEPENDENT BEST BOOKS ON RELIGION 2014 PICK Few things provoke controversy in

the modern world like the religion brought by Prophet Muhammad. Modern media are replete with alarm over jihad, underage marriage and the threat of amputation or stoning under Shariah law. Sometimes rumor, sometimes based on fact and often misunderstood, the tenets of Islamic law and dogma were not set in the religion ' s founding moments. They were developed, like in other world religions, over centuries by the clerical class of Muslim scholars. Misquoting Muhammad takes the reader back in time through Islamic civilization and traces how and why such controversies developed, offering an inside view into how key and controversial aspects of Islam took shape. From the protests of the Arab Spring to Istanbul at the fall of the Ottoman Empire, and from the ochre red walls of Delhi ' s great mosques to the trade routes of the Indian Ocean world, Misquoting Muhammad lays out how Muslim intellectuals have sought to balance reason and revelation, weigh science and religion, and negotiate the eternal truths of scripture amid shifting values.
