## PERIMETER AND AREA - ASU

The circumference is the perimeter of  
a circle. It is a length and so is  
measured in (mm), (cm), (m) or  
(km). An area is measured in square

Asu | calendar.pridesource

Perimeter of a Square A square is a 4-sided polygon in which all the sides are the same length. Therefore, to find the perimeter of a square, we have only to multiply one side by 4. The formula for the area of a square is  $4 \times s$ , where  $s$  is the length of a side. For example, the perimeter of the square below is  $4 \times 8 = 32$ : Perimeter of a Square

### Geometry Notes Perimeter and Area

Page 6 of 57 the process of calculating the area, we multiplied units times units. This will produce a final reading of square units (or units squared). Thus the area of the figure is 112 square units. This fits well with the definition of area which is the number of square units that will cover a closed figure.
