The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's antiapartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the

finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph.

If you drive through Mpumalanga with an eye on the landscape flashing by, you may see, near the sides of the road and further away on the hills above and in the valleys below, fragments of building in stone as well as sections of stone-walling breaking the grass cover. Endless stone circles, set in bewildering mazes and linked by long stone passages, cover the landscape stretching from Ohrigstad to Carolina, connecting over 10 000 square kilometres of the escarpment into a complex web of stone-walled homesteads, terraced fields and linking roads. Oral traditions recorded in the early twentieth century named the area Bokoni – the country of the Koni people. Few South Africans or visitors to the country know much about these settlements, and why today they are deserted and largely ignored. A long tradition of archaeological work which might provide some of the answers remains cloistered in universities and the knowledge vacuum has been filled by a variety of exotic explanations – invoking ancient settlers from India or even visitors from outer space – that share a common assumption that Africans were too primitive to have created such elaborate stone structures. Forgotten World defies the usual stereotypes about backward African farming methods and shows that these settlements were at their peak between 1500 and 1820, that they housed a substantial population, organised vast amounts of labour for infrastructural development, and

displayed extraordinary levels of agricultural innovation and productivity. The Koni were part of a trading system linked to the coast of Mozambique and the wider world of Indian Ocean trade beyond. *Forgotten World* tells the story of Bokoni through rigorous historical and archaeological research, and lavishly illustrates it with stunning photographic images.

Insurgent citizenships have arisen in cities around the world. This book examines the insurgence of democratic citizenship in the urban peripheries of São Paulo, Brazil, its entanglement with entrenched systems of inequality, and its contradiction in violence. James Holston argues that for two centuries Brazilians have practiced a type of citizenship all too common among nation-states--one that is universally inclusive in national membership and massively inegalitarian in distributing rights and in its legalization of social differences. But since the 1970s, he shows, residents of Brazil's urban peripheries have formulated a new citizenship that is destabilizing the old. Their mobilizations have developed not primarily through struggles of labor but through those of the city--particularly illegal residence, house building, and land conflict. Yet precisely as Brazilians democratized urban space and achieved political democracy, violence, injustice, and impunity increased dramatically. Based on comparative, ethnographic, and historical research, *Insurgent Citizenship* reveals why the insurgent and the entrenched remain dangerously conjoined as new kinds of citizens expand democracy even as new forms of violence and exclusion erode it. Rather than view this paradox as evidence of democratic failure and urban chaos, *Insurgent Citizenship* argues that contradictory realizations of citizenship characterize all democracies--emerging and established. Focusing on processes of city- and citizen-making now prevalent globally, it

develops new approaches for understanding the contemporary course of democratic citizenship in societies of vastly different cultures and histories.

This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty-first-century, and how those nations have fashioned educational policies and curricula meant to promote those skills. The book examines six countries—Chile, China, India, Mexico, Singapore, and the United States—exploring how each one defines, supports, and cultivates those competencies that students will need in order to succeed in the current century. *Teaching and Learning for the Twenty-First Century* appears at a time of heightened attention to comparative studies of national education systems, and to international student assessments such as those that have come out of PISA (the Program for International Student Assessment), led by the Organisation for Economic Co-operation and Development. This book 's crucial contribution to the burgeoning field of international education arises out of its special attention to first principles—and thus to first questions: As Reimers and Chung explain, “ much can be gained by an explicit investigation of the intended purposes of education, in what they attempt to

teach students, and in the related questions of why those purposes and how they are achieved. ” These questions are crucial to education practice and reform at a time when educators (and the students they serve) face unique, pressing challenges. The book ’ s detailed attention to such questions signals its indispensable value for policy makers, scholars, and education leaders today.
