Theory is a set of ideas based on a framework to explain a phenomenon, or more simply put its how and why I think something happens. There are theories of everything, but for this introduction we are talking about political, economic and social theory as well as philosophical ideas. These types of theory are pretty self explanatory, political theory concerns itself with politics and political ideas, economics concerns itself with economic systems and how they operate and social theory ...

The idea of quantum field theory began in the late 1920s with British physicist Paul Dirac, when he attempted to quantize the energy of the electromagnetic field; just like in quantum mechanics the energy of an electron in the hydrogen atom was quantized. Quantization is a procedure for constructing a quantum theory starting from a classical ...
