"MotoGP is enjoying a period of unprecedented popularity and Ring of Fire details the acclaim, the heroism and the pressures of riding motorbikes at speeds of more than 200mph. This is a world where manufacturers invest millions and the world champion celebrates by staging mock jail breaks and giving pillion rides to a blow-up doll. One rider warms up for major races by singing Hank Marvin songs on his karaoke machine and a rising Italian star sees the world in terms of black and white energy tubes. Another sees nothing strange in racing with two broken ankles. Ring of Fire covers the recent history of MotoGP, from American Nicky Hayden spectacularly overturning established champion Valentino Rossi in 2006, through the emergence of wild young Australian Casey Stoner as the new champion in 2007, to the fierce rivalry between them and Spaniards Dani Pedrosa and Jorge Lorenzo in what would prove to be one of the most

This is a captivating visual study of the 2010 MotoGP World Champion. Jorge Lorenzo in collaboration with Matt Roberts gathers together a wealth of photographs showing every aspect of his life in motorcycle racing and accompanies them with a sharp commentary. A special feature is the intimate photography of him both off-duty and on-track throughout his title-winning 2010 season, which saw him dominate by winning nine of the 18 MotoGP races and finishing on the podium 16 times. This book is a wonderful insight into the life of a flamboyant new star of sport.

Innovative Thermal and Nonthermal Processing, Bioaccessibility and Bioavailability of Nutrients and Bioactive Compounds presents the implications of conventional and innovative processing on the nutritional and health aspects of food products. Chapters cover the relationship between gastronomic science, nutrition and food science in the development of healthy products, introduce the most commonly used conventional and innovative approaches to preserve foods and extract valuable compounds, describe how processing affects bioavailability and bioaccessibility of lipids, particularly fatty acids, protein, amino acids and carbohydrates, and discuss how processing affects bioavailability and bioaccessibility of minerals, water-soluble vitamins, and fat soluble vitamins. Final sections cover processing, bioavailability and bioaccessibility of bioactive compounds, describing how processing (conventional and non-conventional) is affecting to bioavailability and bioaccessibility of bioactive sulphur compounds, polyphenols, flavonoids, and bioactive peptides. Natural hazards and anthropic activities threaten the human environment. The gathering of field data is needed so as to quantify the impact of such activities. To gather the necessary data researchers nowadays use a great variety of new instruments based on electronics. Yet, the working principles of this new instrumentation might not be well understood by some potential users. All operators of these new tools must gain proper insight so as to be able to judge whether the instrument is selected appropriately and functions adequately. This book attempts to demonstrate some characteristics that are not easy to understand by the uninitiated in the use of electronic instruments. The material presented in this book was prepared with the purpose of reflecting the technological changes that have occurred in environmental modern instrumentation in the last few decades. The book is intended for students of hydrology, hydraulics, oceanography, meteorology and environmental sciences. Basic concepts of electronics, special physics principles and signal processing are introduced in the first chapters in order to enable the reader to follow the topics developed in the book, without any prior knowledge of these matters. The instruments are explained in detail and several examples are introduced to show their measuring limitations. Enough mathematical fundamentals are given to allow the reader to reach a good quantitative knowledge.

## My Story So Far

brings together Fermina Daza, her distinguished husband, and a man who has secretly loved her for more than fifty years.

Casey Stoner, the two-time World MotoGP champion, tells his own explosive story. Showing anything is possible when determination meets talent, two-time World MotoGP champion Casey Stoner shares his incredible journey from being a Queensland toddler with an extraordinary ability on a motorbike to his decision to retire at 27 with nothing left to prove. For the first time, he tells of his early family life, the development of his riding skills and why his parents decided to sell everything and travel from Australia to Europe to chase the dream and support his aim to become World Champion when he was only 14 years old. As fearless with his opinions as he is on the racetrack, Casey includes all the highs and lows of his life so far: the real reason he left for Europe so young, his thoughts on racing as it stands today, the riders' hierarchy, the politics of racing, the importance of family, his battle with illness and why he decided to turn his back on a multimillion-dollar contract when he was still winning. And he also lets us in on some of the new goals he has set for himself.
