Home theater projectors: 6 things to know before you buy. We'll walk you through the basics from lumens to lamp types, DLP vs. LCD and setup to seating positions.

Home theater projectors: 6 things to know before you buy ... In addition to being used in televisions, LCD technology is used in a number of the video projectors that are on the market. In your television, there are a number of LCD chips that are used to display the image. Depending on the resolution of your television, there can be millions of LCD chips used, each one representing one pixel.

What is an LCD Projector? Buying Guide 2019

LCD - LCD (liquid crystal display) projectors place three LCD glass panels in the projector, one for red, one for green, and one for blue. Light passes through the panels and individual pixels open or close to produce the image. Pros: LCD projectors typically appear brighter and have better color accuracy. This leads to an image that seems more sharp and vivid overall.
