## **Systems Thinking: Complexity**

The point to emphasize is that the interaction of counteracting feedback loops - the prime source for generating chaos and complexity - is a common phenomenon in our daily life. Understanding these dynamics is the key to getting a handle on the notion of complexity, interdependency and counter-intuitive behavior of social systems.

Where traditional leaders strive to eliminate chaos and reduce uncertainty, complexity leaders thrive in chaos and absorb uncertainty. Although there appears to be tension between these two leadership types, Uhl-Bien contends that they can co-exist within healthcare organizations. Similar to aligning responses to uncertainty with level of uncertainty, different types of leadership may be required for different objectives and functions of the organization.
