Municipal solid waste (MSW) is the solid waste material commonly called “ trash ” or “ garbage ” that is generated by homeowners and businesses. Most state and/or federal rules permit landfills to contain either hazardous or nonhazardous wastes, but more than 95% of landfilling involves MSW.

~~Municipal Solid Waste – an overview | ScienceDirect Topics~~

Municipal solid waste, commonly known as trash or garbage in the United States and rubbish in Britain, is a waste type consisting of everyday items that are discarded by the public. "Garbage" can also refer specifically to food waste, as in a garbage disposal; the two are sometimes collected separately. In the European Union, the semantic definition is 'mixed municipal waste,' given waste code 20 03 01 in the European Waste Catalog. Although the waste may originate from a number of sources that

~~Municipal solid waste – Wikipedia~~

12.2.2 Municipal solid waste. MSW is solid waste resulting from, or incidental to, municipal, community, commercial, institutional, and recreational activities, and it includes garbage, rubbish, ashes, street cleanings, dead animals, medical waste, and all other nonindustrial solid waste. MSW is generated by households, offices, hotels, shops, schools, and other institutions.
