This book features high-quality research papers presented at the International Conference on Advanced Computing and Intelligent Engineering (ICACIE 2017). It includes sections describing technical advances in the fields of advanced computing and intelligent engineering, which are based on the presented articles. Intended for postgraduate students and researchers working in the discipline of computer science and engineering, the proceedings also appeal to researchers in the domain of electronics as it covers hardware technologies and future communication technologies.

With chapters culled from the acclaimed Bridge Engineering Handbook, Bridge Engineering: Substructure Design focuses on the various components comprising and affecting bridge substructures. These include bearings, piers and columns, towers, abutments and retaining structures, footings and foundations, and bridge hydraulics. For each component, the

"This book brings together excellent contributions spanning the historic basis of neuropsychology in forensic practice, ethical and legal issues, and practical instruction....The editors have done an outstanding job in providing us with a volume that represents state-of-the-art in forensic neuropsychology. This volume also will be useful for graduate students, fellows, and practitioners in clinical neuropsychology." –Igor Grant, MD, Executive Vice Chair, UCSD Department of Psychiatry This book serves as an updated authoritative contemporary reference work intended for use by forensic neuropsychologists, psychiatrists, neurologists, neurosurgeons, pediatricians, attorneys, judges, law students, police officers, special educators, and clinical and school psychologists, among other professionals. This book discusses the foundations of forensic neuropsychology, ethical/legal issues, practice issues and special areas and populations. Key topics discussed include the principles of brain structure and function; history of clinical neuropsychology; neuropsychology of intelligence, normative and scaling issues, and symptom validity testing and neuroimaging. Special areas and populations will include disability and fitness for duty evaluations, aging and dementia, children and adolescents, autism spectrum disorders, substance abuse, and Neurotoxicology. A concluding section focuses on the future of forensic neuropsychology.

Ben Hogan's former ball shagger recounts firsthand stories of the golf legend's revelations, for the first time, Hogan's Swing Secret, a source of mystery to golfers for more than fifty years. Ben Hogan's pro golf record is legendary. A four-time PGA Player of the Year, he celebrated sixty-three tournament wins and became known as a man of few words and fewer close friends. Most of what we know about Hogan has been based on myth and speculation. Until now. In the 1960s, though Hogan's competitive career was over, he kept the practice habits that made him famous and remade modern competitive golf. He hired seventeen-year-old Jody Vasquez to help. Each day, after driving to a remote part of the course at Shady Oaks Country Club, Hogan would spend hours hitting balls and Vasquez would retrieve them. There, and over the course of their twenty-year friendship, Hogan taught Jody the mechanics of his famous swing and shared his thoughts on playing, practicing, and course management;unknowingly revealing much about his character, values, and beliefs, and the events that shaped them. In Afternoons with Mr. Hogan, Jody Vasquez shares dozens of stories about Hogan, from the way he practiced, selected his clubs, and interacted with other star players to his little-known humor and generosity. Combining the gentle insight of Tom Kite's A Fairway to Heaven (which recalls Kite's golf education under Harvey Penick) with the sage perspective of Penick's own Little Red Book, Vasquez's tribute is funny, poignant, and full of advice for golfers of all levels.

The thoroughly revised and updated 4th edition of 101 Speed Tests for SBI & IBPS Bank PO Exam is based on the concept of TRP || Test, Revise and Practice. The rapidly growing volume of available digital documents of various formats and the possibility to access these through Internet-based technologies, have led to the necessity to develop solid methods to properly organize and structure documents in large digital libraries and repositories. Due to the extremely large volumes of documents and to their unstructured form, most of the research efforts in this direction are dedicated to automatically infer structure and schemas that can help to better organize huge collections of documents and data. This book covers the latest advances in structure inference in heterogeneous collections of documents and data. The book brings a comprehensive view of the state-of-the-art in the area, presents some lessons learned and identifies new research issues, challenges and opportunities for further research agenda and developments. The selected chapters cover a broad range of research issues, from theoretical approaches to case studies and best practices in the field. Researcher, software developers, practitioners and students interested in the field of learning structure and schemas from documents will find the comprehensive coverage of this book useful for their research, academic, development and practice activity.

In clear, easy to read and understand language, this controversial book reveals the full technical details on how researchers and data recovery engineers can build a DES cracker. It includes design specifications and board schematics, as well as full source code for the custom chip.

A collection of 300 multiple-choice questions which are divided into subject chapters corresponding with those in General and Systematic Pathology, a complementary text. However, full explanatory answers are supplied so that this book may be used with any pathology textbook. The questions take the form of a stem with five branches which must be marked true or false. This is the most commonly used system of questions in British medical schools and is usually scored as +1 for a correct response and zero for no response.
