A key team member behind The Secret and his business partner offer the specific tools and mental strategies to help readers leap ahead in any career or business venture and achieve major financial success. In this visionary work, New York Times bestselling author John Assaraf and business guru Murray Smith reinvent the business book for the twenty-first century. Two of the most successful entrepreneurs in the world, they combine forces to bring their special insights and techniques together in a revolutionary guide for success in the modern business environment. Assaraf and Smith know how to minimize risk and maximize success, and The Answer provides a framework for sharing their wisdom, experience, and skills with the millions of people who want to accomplish their own dreams in life. Using cutting-edge research into brain science and quantum physics, they show how readers can actually rewire their brains for success and create the kind of extraordinary lives they want. By teaching readers how to attract and use newly discovered "uncommon" senses to achieve business success, the authors demonstrate the beliefs, habits, thoughts, and actions that they have used to build eighteen multimillion-dollar companies. Any reader who follows this step-by-step process to build his or her career will experience an enormous life transformation and reach an exceptional level of living.

Environmental insults such as extremes of temperature, extremes of water status, and deteriorating soil conditions pose major threats to agriculture and food security. Employing contemporary tools and techniques from all branches of science, attempts are being made worldwide to understand how plants respond to abiotic stresses with the aim to manipulate plant performance that is better suited to withstand these stresses. This book searches for possible answers to several basic questions related to plant responses towards abiotic stresses. Synthesizing developments in plant stress biology, the book offers strategies that can be used in breeding, including genomic, molecular, physiological, and biotechnological approaches that have the potential to develop resilient plants and improve crop productivity worldwide.

The same amount of water has been present on our planet for about 4 billion years, since shortly after the Earth was formed. Since then it has cycled through evaporation, condensation, precipitation and surface runoff multiple times. Water scarcity as an abiotic factor ranging from moderate to severe stress levels, accompanied by loss of moisture in the soil, is extremely hard for most organisms to cope with, particularly terrestrial plants and their food-chain dependents. Because of the potential for increasing temporary, or possibly permanent, drought conditions in the future, there is intense focus on improving plant resistance to drought and increasing yield performance in water- limited environments through genotype selection in important crops. This book aims to contribute to understanding of how plants and other organisms respond to water stress conditions, and the various survival strategies adopted under differing moisture levels.

To avoid grabbing every business owner he meets by the shoulders and shaking them, millionaire maker Dan S. Kennedy has joined with marketing strategist Kim Walsh-Phillips to help business owners, private practice professionals, and professional marketers start making dollars and cents of their social media marketing. Daring readers to stop accepting non-monetizable " likes " and " shares " for their investment of time, money, and energy, Kennedy and Walsh-Phillips urge readers to see their social platforms for what they are—another channel to reach customers and gain leads and sales for their efforts. Illustrated by case studies and examples, this No B.S. guide delivers practical strategies for applying the same direct- response marketing rules Kennedy has himself found effective in all other mediums. Covers:

- How to stop being a wimp and make the switch from a passive content presence into an active conversion tool
- How to become a lead magnet by setting up social media profiles that focus on the needs of ideal prospects (not the product or service)
- Creating raving fans that create introductions to their networks
- How to move cold social media traffic into customers
- The role of paid media and how to leverage social media advertising to drive sales

Why is the Mona Lisa the most famous painting in the world? Why did Facebook succeed when other social networking sites failed? Did the surge in Iraq really lead to less violence? And does higher pay incentivize people to work harder? If you think the answers to these questions are a matter of common sense, think again. As sociologist and network science pioneer Duncan Watts explains in this provocative book, the explanations that we give for the outcomes that we observe in life-explanations that seem obvious once we know the answer-are less useful than they seem. Watts shows how commonsense reasoning and history conspire to mislead us into thinking that we understand more about the world of human behavior than we do; and in turn, why attempts to predict, manage, or manipulate social and economic systems so often go awry. Only by understanding how and when common sense fails can we improve how we plan for the future, as well as understand the present-an argument that has important implications in politics, business, marketing, and even everyday life.

For more than 160 years, the cannabis industry was a valued and trusted friend of the American people. Thirty-one consecutive presidents, including George Washington and Abraham Lincoln, didn ' t have a problem with the cannabis plant. It was the most valued commodity traded for on the free market until 1937. In Secrets of the Cannabis Industry, author Chuck Allen Jr. provides a look at the cannabis industry and the men and women who risk their family, friends, and freedom to work within it. Each chapter narrates a story from the subculture of cannabis entrepreneurs. There ' s Professor Muzzo, who unknowingly helped one of his students achieve financial success by selling a popular fast-food item spiced with a secret ingredient; a postal employee with a secret garden in his basement; an entrepreneur who made a fortune selling franchises for indoor-growing opportunities; and a fireman ' s wife who owned a video store with extra-special movie-rental benefits. Secrets of the Cannabis Industry considers the courage and the determination of these entrepreneurs and shares the secrets of how they became

independent and financially successful in the cannabis industry.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Looks at four key analytic processes that aid decision making.
