important area of research because of its close link with health disparities. In this study, we used a qualitative approach to investigate healthcare providers' perspectives on the health literacy of immigrant and refugee parents and its association with children's health.

~~Healthcare providers' perspectives on parental health ...~~

A number of medication errors occur in the home (Walsh et al 2011), including missed doses, underdosing and overdosing as a result of poor parent health literacy. While it is clear that low parental health literacy correlates with worse health outcomes for children, limited research has focused on children themselves.

Because parents play a key role in children's dental health, the aim of this study was to determine the relationship between parents' oral health literacy (OHL) and their children's dental health status in Babol, Iran.

Parents' Oral Health Literacy and its Impact on their ...

(Royal Society for Public Health) Child health literacy appears to be a distinct issue to adult health literacy and professionals should consider the specific needs of children and young people in terms of improving their health literacy to support them in becoming health literate adults and in meeting their communication and health information needs in addition to considering parental health literacy.

KHSA has developed its own practitioner training to help presenters understand health literacy and build their skills in working with low-literacy adults. We also have created a unique parent training curriculum, based on the "What to Do When Your Child Gets Sick" book, designed to teach parents in one-on-one or small group settings.
