Some still think of project management as a domain only applicable to construction, engineering, or technology projects. However, over the last two or three decades, project management skills have been recognized as essential skills in all domains, and positions. Not everyone needs to be a project manager but most professionals can benefit from project management learning. The Customizable and Adaptable Methodology for Managing Projects (CAM2P) is an approach developed by the author in 2007. This approach have been used on various projects such as events, marketing, business development, engineering, construction, capital intensive projects, launching a business or a new product, among numerous others. This book is a sample and simple project, using CAM2P. In this sample (case), the author show the readers how to use the method from idea to closure, step by step, leading to the successful delivery of a BOOK. This e-book is the first in a series of similar books.

A Guide to the Project Management Body of Knowledge (PMBOK® Guide) provides generalized project management guidance applicable to most projects most of the time. In order to apply this generalized guidance to construction projects, the Project Management Institute has developed the Construction Extension to the PMBOK® Guide.This Construction Extension provides construction-specific guidance for the project management practitioner for each of the PMBOK® Guide Knowledge Areas, as well as guidance in these additional areas not found in the PMBOK® Guide:All project resources, rather than just human resourcesProject health, safety, security, and environmental managementProject financial management, in addition to costManagement of claims in constructionThis edition of the Construction Extension also follows a new structure, discussing the principles in each of the Knowledge Areas rather than discussing the individual processes. This approach broadens the applicability of the Construction Extension by increasing the focus on the "what" and "why" of construction project management. This Construction Extension also includes discussion of emerging trends and developments in the construction industry that affect the application of project management to construction projects.
