API Resources REST API Design and Development Restful Web Api Design With

A well-designed web API should aim to support: Platform independence. Any client should be able to call the API, regardless of how the API is implemented internally. This requires using standard protocols, and having a mechanism whereby the client and the web service can agree on the format of the data to exchange.

API design guidance - Best practices for cloud ...

RESTful APIs have various methods to indicate the type of operation we are going to perform with this API — GET — To get a resource or collection of resources. POST — To create a resource or collection of resources. PUT/PATCH — To update the existing resource or collection of resources.

REST Web Services API Design - DNMTEchs - Share and store ...

A typical design pattern with REST APIs is to build your endpoints around resources. These are the “nouns” to HTTP method verbs.

Your API design will be much easier to understand if these names are descriptive. For example, if you’re working on a cookbook API, you might include the following endpoint:

API Design Patterns | RESTful API Web Services Design ...

REST or RESTful API design (Representational State Transfer) is designed to take advantage of existing protocols. While REST can be used over nearly any protocol, it usually takes advantage of HTTP when used for Web APIs. This means that developers do not need to install libraries or additional software in order to take advantage of a REST API design.

developers, if it is confusing or not verbose, then the developer will start finding the alternatives or stop using it.

RESTful API Designing guidelines — The best practices ...

Too many APIs are just built on an as-needed basis. In this course, *Designing RESTful Web APIs*, you will design your API to meet your needs before you embark on implementing the service. First, you will explore the design philosophies of creating an API on top of REST without the dogma. Next, you will discover how to design APIs to take URIs, verbs, message bodies, versioning and security into account.
