Rfid For Dummies

RFID is a very valuable business and technology tool. It holds the promise of replacing existing identification technologies like the bar code. RFID offers strategic advantages for businesses because it can track inventory in the supply chain more efficiently, provide real-time in-transit visibility(ITV), and monitor general enterprise assets.

What the Heck Is RFID? - dummies

Many companies have asked suppliers to begin using RFID (radio frequency identification) tags by 2006 RFID allows pallets and products to be scanned at a greater distance and with less effort than barcode scanning, offering superior supply-chain management efficiencies This unique plain-English resource explains RFID and shows CIOs, warehouse managers, and supply-chain managers how to implement RFID tagging in products and deploy RFID scanning at a warehouse or distribution center Covers the ...

RFID For Dummies By Patrick J. Sweeney | Used ...

An RFID network is a peer-to-peer architecture capable of aggregating highly actionable data to a central location. Imagine this: The use of a single tag, no larger than a book of matches, is multiplied millions of times over within a global supply chain, which creates a peer-to-peer network that shares data in real time across a limitless number of boundaries.
