---

### 58315 SEVEN STAGES OF THERAPEUTIC GROWTH IN THEORY PCT

Carl Rogers (1902-1987) was a humanistic psychologist who agreed with the main assumptions of Abraham Maslow. However, Rogers (1959) added that for a person to "grow", they need an environment that provides them with genuineness (openness and self-disclosure), acceptance (being seen with unconditional positive regard), and empathy (being listened to and understood).

Stage 7 – Integration. At the end of the change process, and all being well, you will be comfortable, confident, and a feeling that you belong or are seeking belonging in your new way of life. Now just a realisation on my part. Change may be difficult at times and for a long period, but it can also be exciting, energising and uplifting.

---

## The Seven Stages Of Change - The Greening of Gavin

Studies indicate that Rogers, who was one of the psychologists, came up with seven stages that he observed when dealing with his clients who were in the process of therapy. The process is considered to be unpredictable even though clients tend to move from one stage to the next (Trull, 2013).
