iRefer is the essential radiological investigation guidelines tool from The Royal College of Radiologists (RCR). The eighth edition of the guidelines is available online and in booklet format. The guidelines are also being piloted in a Clinical Decision Support System. The RCR is working with MedCurrent to deliver the pilot projects in the UK and elsewhere.

About iRefer | The Royal College of Radiologists

iRefer: Making the best use of clinical radiology, 8th edition is a synthesis of evidence-based guidelines from UK and international sources and provides recommendations for everyday use of clinical imaging services.

iRefer

The current edition, the eight, was published in 2017 and is called iRefer. iRefer provides referring clinicians with evidence-based advice on the best imaging tests or investigations to request. The College is working with a technology partner, MedCurrent, to pilot delivery of iRefer through Clinical Decisions Support software, so that referring clinicians can have access to iRefer as part of their normal workflow.

iRefer CNS | The Royal College of Radiologists

To facilitate appropriate referrals to radiology departments, The Royal College of Radiologists (RCR) has published RCR iRefer Guidelines: Making the best use of clinical radiology (iRefer) since 1989. iRefer is now widely accepted as a major tool to promote evidence-based imaging. The eighth edition of the guidelines was published in May 2017.
