# Online Library Simplified

Spreadsheet for  
Homebuilder The  
range equation  
contains L/D which in  
turn contains "q" the  
dynamic pressure, "q"  
is calculated with the  
velocity in fps, but the  
sfc is in hour units so  
it must be divided by  
3600 to convert from  
lb/hour/hp to  
lb/sec/hp so that the  
units will match up.
