The manual, prepared by David Mills, professor emeritus at the College of the Redwoods in California, provides solutions for selected odd-numbered end-of-chapter problems in the textbook and uses the same side-by-side format and level of detail as the Examples in the text.

The perfect way to prepare for exams, build problem-solving skills, and get the grade you want! For Chapters 1-22, this manual contains detailed solutions to approximately 20% of the problems per chapter (indicated in the textbook with boxed problem numbers). The manual also features a skills section, important notes from key sections of the text, and a list of important equations and concepts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This solutions manual for students provides answers to approximately 25 per cent of the text's end-of-chapter physics problems, in the same format and with the same level of detail as the worked examples in the textbook.

These solutions manuals contain detailed solutions to more than half of the odd-numbered end-of-chapter problems from the textbook. Following the problem-solving strategy presented in the text, thorough solutions are provided to carefully illustrate both the qualitative and quantitative steps in the problem-solving process.
