Walmart and "Made in China" are practically synonymous; Walmart imports some 70 percent of its merchandise from China. Walmart is now also rapidly becoming a major retail presence there, with close to two hundred Walmarts in more than a hundred Chinese cities. What happens when the world's biggest retailer and the world's biggest country do business with each other? In this book, a group of thirteen experts from several disciplines examine the symbiotic but strained relationship between these giants. The book shows how Walmart began cutting costs by bypassing its American suppliers and sourcing directly from Asia and how Walmart's sheer size has trumped all other multinationals in squeezing procurement prices and, as a by-product, driving down Chinese workers' wages. China is also an inviting frontier for Walmart's global superstore expansion. As China's middle class grows, the chain's Western image and affordable goods have become popular. Walmart's Arkansas headquarters exports to the Chinese stores a unique corporate culture and management ideology, which oddly enough are reminiscent of Mao-era Chinese techniques for promoting loyalty. Three chapters separately detail the lives of a Walmart store manager, a lower-level store supervisor, and a cashier. Another chapter focuses on employees' wages, "voluntary" overtime, and the stores' strict labor discipline. In 2006, the official Chinese trade union targeted Walmart, which is antilabor in its home country, and succeeded in setting up union branches in all the stores. Walmart in China reveals the surprising outcome. Contributors: Diana Beaumont, coeditor of China Labor News Translations; Anita Chan, University of Technology, Sydney; David J. With his outspoken nature, he also talks about ways as to how the company could improve customer service and increase profits. Organized around common rhetorical situations that occur all around us, **INVENTING ARGUMENTS** shows students that argument is a living process rather than a form to be modeled. The text's focus on invention teaches students to recognize the rhetorical elements of any argumentative situation and apply the tools of argument effectively in their own writing. Students are introduced to the basic layers of argument in early chapters, with material arranged into increasingly sophisticated topics beginning with the most obvious or explicit layers (claims) and moving to the more implied layers of assumptions, values, beliefs, and ideology. By the time they finish Part I, your students will have a thorough understanding of argument, which they can then apply to the invention projects in Chapters 7 – 12.
