very stunning book. It
talking about different
kinds of buildings, the
discovery of the
buildings, how they 1st
started building them,
and many others. 1 of
the most important thing
about building tall
buildings is that we
need to know the
strengths in them and
the weakness.

If a skyscraper is 200 m (650 ft) tall and a gale blows it hard at the top, there's a huge turning force trying to tip the whole building over to the side. That's why tall

Where To Download Why Buildings need deep foundations (where a significant part of the building is constructed

underground to support
the part that's above
ground). If something
tries to push the top the
building to one side, the
foundations effectively
resist and push it back in
the opposite direction!
